## Standard Risk Assessment Definitions

- **RISK** - is the *potential* to cause harm. e.g. contract coronavirus
- **Control Measures** - are the actions taken to prevent harm
- **Severity (S)** - rated as follows:
  - **MAJOR** = 3
  - **MODERATE** = 2
  - **SLIGHT** = 1
- **Likelihood (L)** - rated as follows:
  - **LIKELY** = 3 could happen anytime.
  - **POSSIBLE** = 2 might happen sometimes.
  - **UNLIKELY** = 1 where harm is unlikely to occur.
- **Risk Rating (RR)** - is a means of 'measuring' the risk by multiplying the *severity* by the *likelihood* e.g. a *severity* factor 'MODERATE' with a *likelihood* factor 'POSSIBLE' would give a risk rating of  $2 \times 2 = 4$ . This should represent the risk at the time of the assessment, given the control measures in place at the time.
- **Additional Control Measures** – these are the measures Headteachers are taking locally, including amendments made to risk other assessments, to manage the Risk Rating.
- **Risk Rating**
