

## Maths home learning tasks

Any answers that need recording can be recorded in the exercise book provided. You don't need to print out this document.

### Telling the time

In year 2, children need to be able read a clock that shows: o'clock, half past, quarter past and quarter to.

How about having a go at making a clock. In this video it shows you how to make a clock using a paper plate. If you don't want to use a paper plate, you could draw around a plate on a piece of paper instead. If you don't have a split pin for the clock hands you could just use your finger to hold them down in the middle whilst you are using it. Be careful writing on the numbers by making sure they are evenly spread out just like on a real clock.

<https://www.youtube.com/watch?v=c7DM2xmaf4c>

Throughout this week point out to your child when these times are showing on the clock. You can do this on a digital clock and an analogue clock.

If you have managed to make a clock then practise showing o'clock, half past, quarter to, quarter past.

Here are some games that you can play online to practise telling the time.

Can you solve this time problem?

Quarter past is always  
later than quarter to.

Do you agree with Teddy?  
Explain why.

### Mental maths:

Practise your 2,3,5,10 times table by doing quick fire multiplication questions. For example: What is  $2 \times 2$ ? What is  $5 \times 3$ ?  
Games to help you practise:
